Product Overview: Door Pusher:

Tool quickly and quietly forces doors inward defeating locksets and deadbolts. Four inches of powered travel ensures your mission is successful. Tool includes rear strike plate to improve setting the tool into the door jamb. Manufactured from high strength, heat treated steel and coated in tactical black for extremely long service life. Hydraulic quick coupler included.

Jamb Spreader:

To spread door jambs, simply install extension rod onto top of Door Pusher. Tool now can easily spread door jambs for a very quiet entry to minimize property damage. Rotate adjustment rod in or out depending on size of doorway.

Remote cutter:

Hydraulic bolt cutter quickly and quietly cuts through padlocks and chains to get the job done. Cutter is small enough to work in tight locations yet offers same

cutting capacity as our 24" full length cutters. Hydraulic quick coupler included.

Spreading wedge:

1 Ton spreading wedge makes quick work of opening security doors and gates, reinforced windows, truck lids, etc. Design is perfect balance of compact size and high capacity. The RatWedge™ provides over 3" of powered travel and creates 1 ton of spreading force.

Manual Powered Pump:

Manual hydraulic pump: 8,000 psi pressure. All tools are quickly accessible in rugged, custom backpack.

- Spring loaded handle to facilitate easy foot pump operation.
- High quality, made in the USA pump with accompanying 6' hose.

Tools are conveniently carried in a custom, heavy duty back pack constructed with:

- Adjustable padded shoulder straps and adjustable padded hip belt -
- Semi-rigid backing material for strength and comfort - Loop handle on top to lift pack - Backpack material: Constructed of Mil-C-43734, Class 3 water repellent 11-ounce 1000-denier nylon. - Available in Black, Olive Drab, or Coyote Tan
