## Product Description

### HS4 - Hydraulic Spreader Wedge

This 3 ton hydraulic spreader wedge opens 4" (10.1cm) under full load and is capable of opening doors, window grills, gates, vehicle entries and security bars and many other applications. The blade tips are a thin 1/8" (3mm) to get into the tightest gaps. Machined barbs on the blades help keep the tool fully engaged while opening. Spring return closes tool automatically.

Compact and easy to use, the tool provides 3 tons of spreading force and has a 4" stroke. This tool is the perfect balance of size, opening force and value.

Tool requires hydraulic pump to operate. Wedge can be ordered separately or with pump and 6' hose.

Quickly gain entry using our [battery operated hydraulic pump](#).

Pump handle is spring loaded for use with hand or foot.

Use one of our lightweight [pry bars](#) to assist in inserting the wedge's jaws.
