

# COLLAPSIBLE PRY BAR

Extremely light, portable and rugged telescoping prybar. This special operations tool is the perfect solution for many real world scenarios. It provides versatility and power yet is compact and light enough to be easily carried or stowed. The perfect balance between *weight* and *function*.

The thin adze end is perfect to pry open doors, windows, gates, etc. The telescoping shaft is constructed from high strength Chromoly steel. It extends from a compact - *18" up to 30"* for maximum leverage. The *proven push button design* locks the shaft in the open and closed position allowing the tool to be used open or closed.
