

BR35-2 Two Handle RatRam™

The 2 Handle RatRam™ is a full 35 lb. ram yet only 18.5" long.

Conventional 35 lb. rams are over 40" long and bulky to carry and transport. The body of the RatRam-2™ is single piece construction for rigidity and durability. The over size 5 inch ram face is fabricated from solid Ultra-High Molecular Weight Plastic reducing the threat of sparks and re-coil.

Two flexible reinforced handles optimize control of this powerful ram. Heavy duty adjustable nylon shoulder strap with pad is available and attached with heavy-duty spring clasps for quick removal. Coated in tactical black.

BR35-2

**Product weight may vary 1-2lbs due to casting density*
