

2 Handle RatRam™

The 2 Handle RatRam™ is a full 35 lb. ram yet only 19" long.

Conventional 35 lb. rams are over 40" long and bulky to carry and transport. The body of the RatRam-2™ is single piece construction for rigidity and durability. The ram face is fabricated from solid Ultra-High Molecular Weight Plastic reducing the threat of sparks and re-coil.

Two flexible reinforced handles optimize control of this powerful ram. Heavy duty adjustable nylon shoulder strap with pad is available and attached with heavy-duty spring clasps for quick removal. Coated in tactical black.
